

PATENT

Docket No.: DC-02461 (16356.549)

**A DIAGNOSTIC ARCHITECTURE FOR USE WITH AN INTERFACE BETWEEN
AN OPERATING SYSTEM AND PLATFORM FIRMWARE**

Abstract of Disclosure

5

A method performed by a computer system is provided. The method includes detecting a test module interface associated with a test module and calling a function identified by the test module interface to cause a test configuration of the test module to be created.
